INTRODUCTION

Hello, fellow Bernd or Bernadette who's reading. I will be brief so this doesn't turn into a tiresome and uninteresting read. The survey was conducted from 16 to 17 April 2013, spanning a total of 24 hours, so that every power hour could have replied the survey in its peak.

People must know about my troubles

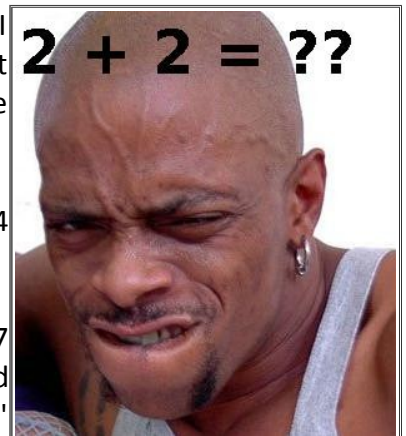

Shortly after the survey was made, I was told I had to write a 10-pages paper otherwise I'd fail ^another class at college. Days later, I travelled. Then, I had plenty of free time but procrastinated as a true Bernd, perplexed by the amount of data I have to face. At some point I realised the survey wasn't going to analyse itself alone, so I decided to get my hands dirty. Roughly more than 40 hours have been invested in this, and I don't regret it.

Numbers

There were over 700 replies, some of which were blatantly fake. Those I deleted. Are there fake answers I did not delete? Without a doubt, but reading this paper you will realise a few fake answers here and there did not manage to hurt the survey at the big picture.

At some point, most of answers became '*spordo :DD ebin*' and, since 24 hours had passed since its beginning, I decided to close the survey.

There were total **672** valid answers. Countries which reached at least 7 answers were awarded with their own *Country profile*, a detailed analysis and an intredasting overview of said country, based on posters' answers. A total of **21** countries had more than 7 respondents.

A few considerations

- In order to determine how's one body type, body mass index was used.
- Those who have never kissed, fugged and had a gf/bf are called *Hardcore Bernds*.
- After considering several alternatives, I decided to release the raw data, with a few remarks:
 - No sex answers (this way Bernadette's anonymity is respected)
 - Rare balls responses (Indonesia, Pakistan, Paraguay, for instance) had their answers completely removed in order to preserve their anonymity
- Distinction between immigrants and non-immigrants were also deleted to preserve their anonymity.

SECONDARY STATS

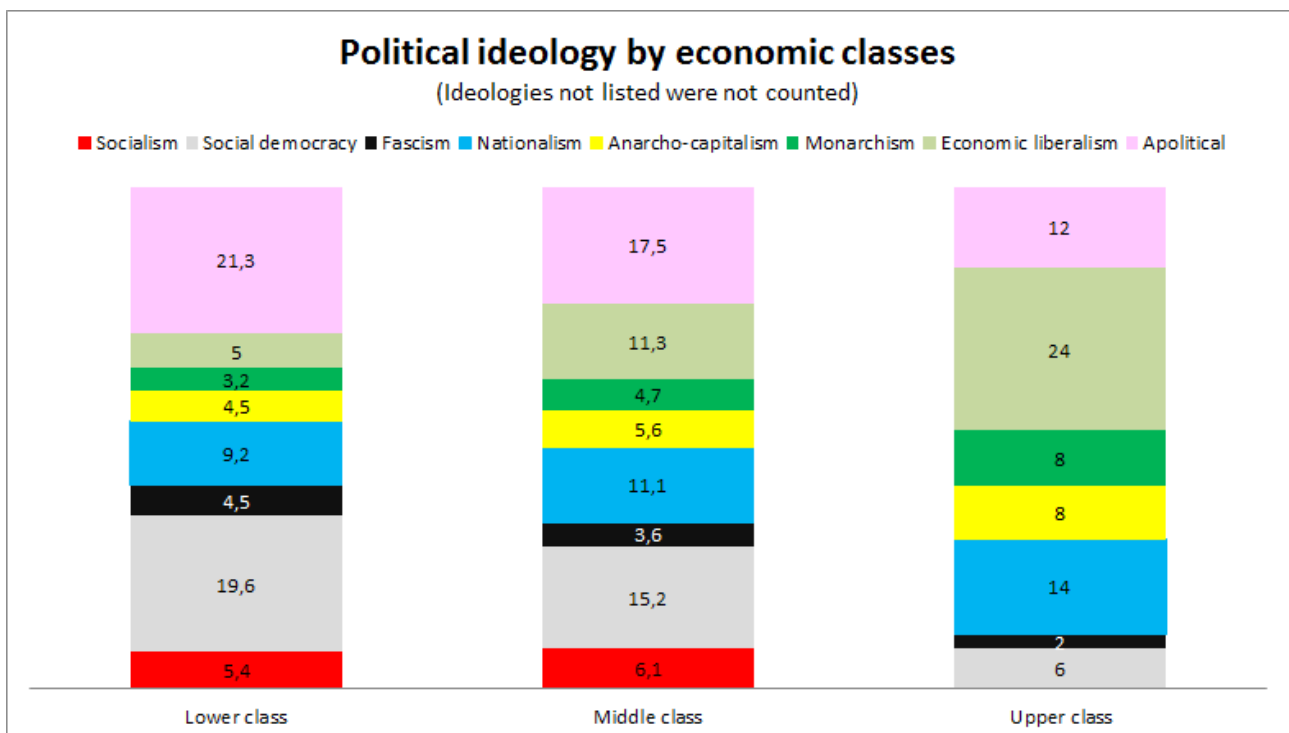

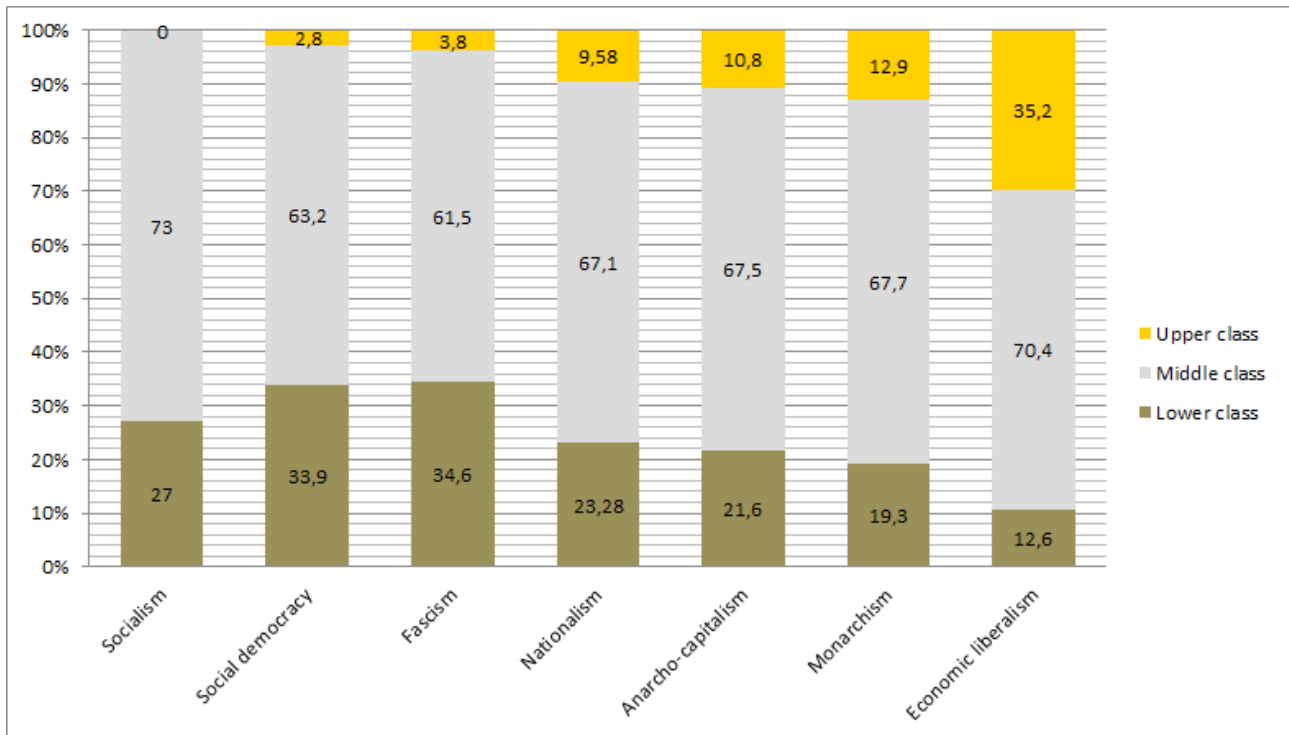

POLITICS

Is socialism a poorfag ideology? Are they just jelly of rich's people money?

Is economic liberalism a richfag ideology? Are they just egoistic about their money and don't think poorfags should be helped by them?

Observations:

- No socialist hails from the upper class;
- More than ⅓ of fascists and social democrats are lower class;
- Of all ideologies, economic liberalism has the lowest appeal to the lower classes;
- The richer people are, the less likely they are to be apolitical.

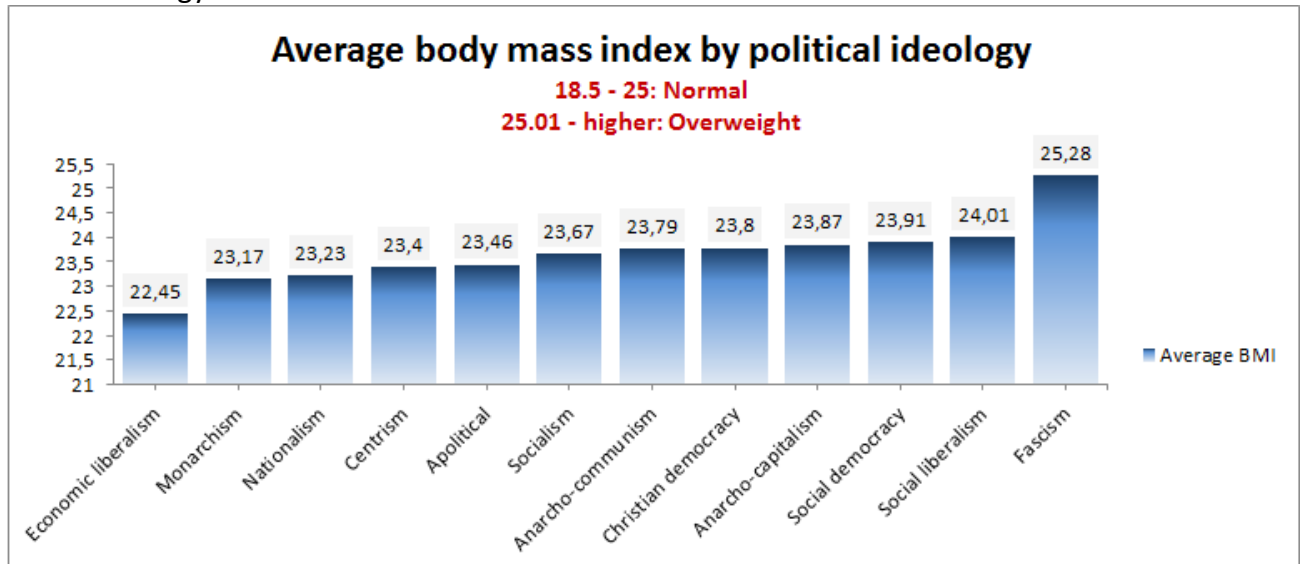

SECONDARY STATS

POLITICS

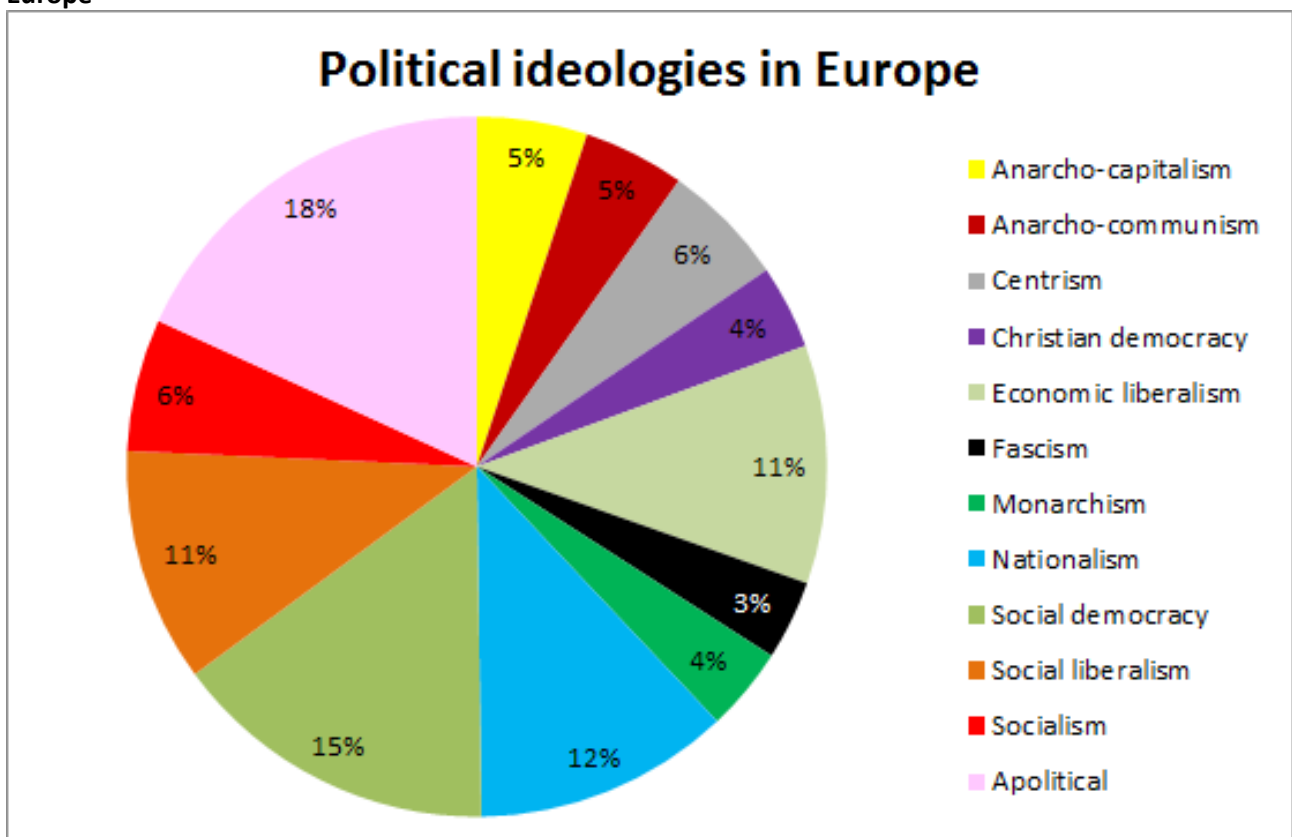

Which ideology has the fattest adherents?

Fascism is the only political ideology whose adherents are, on average, overweight.

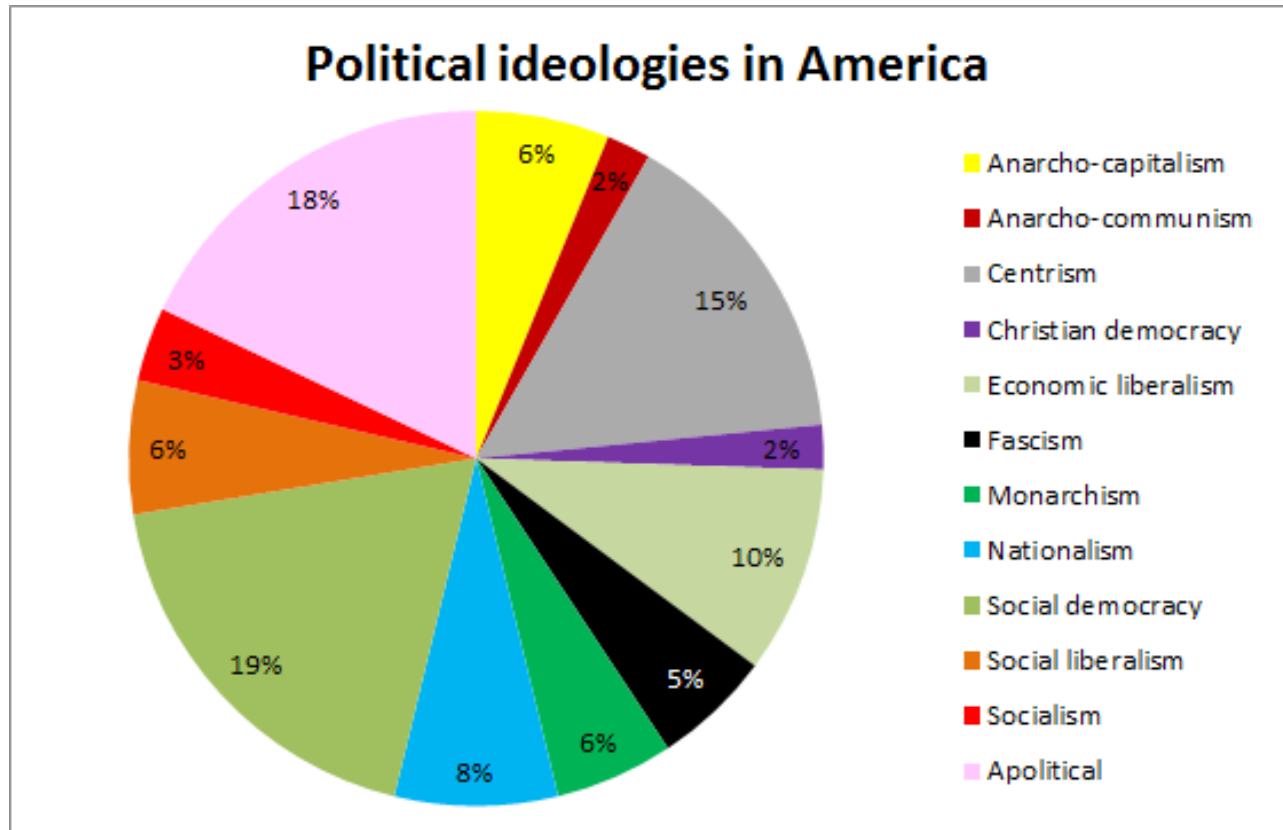

How are ideologies distributed continents-wise?

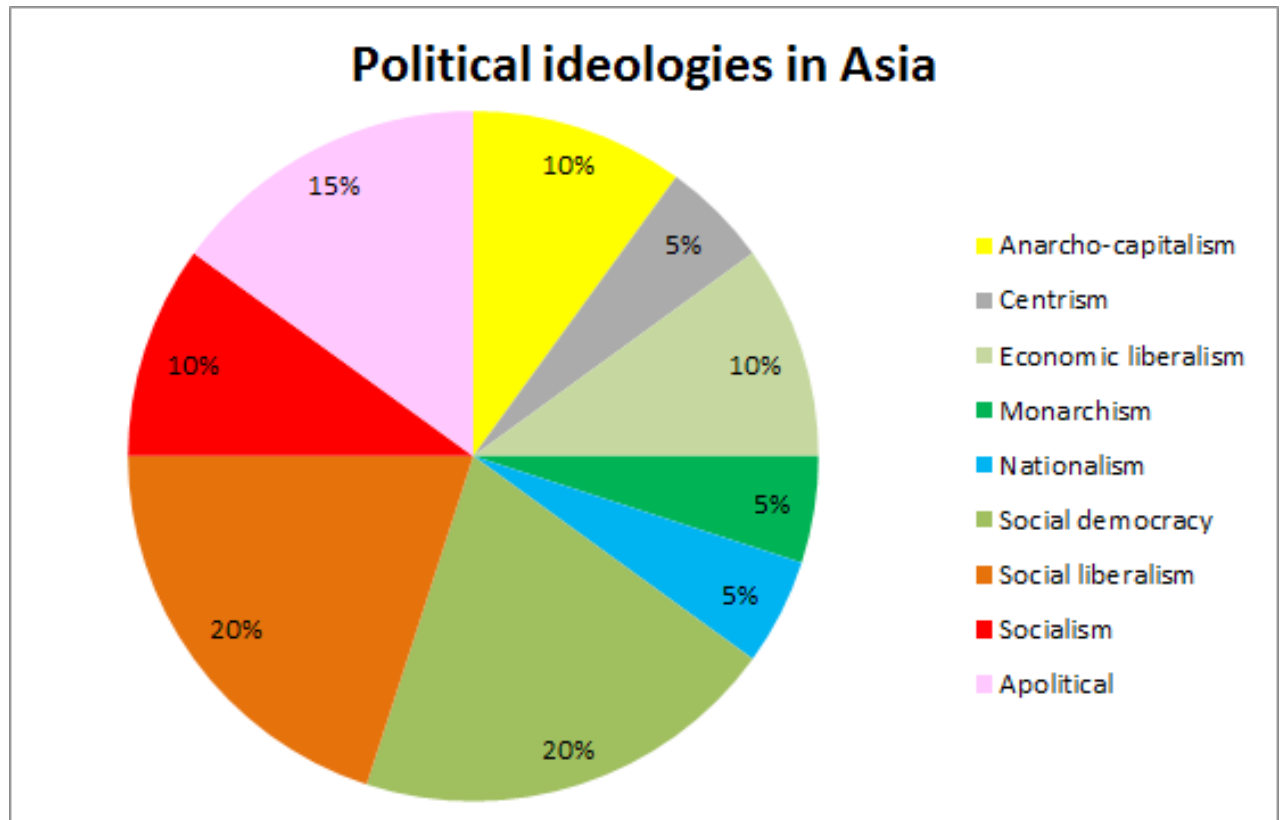

Europe

America

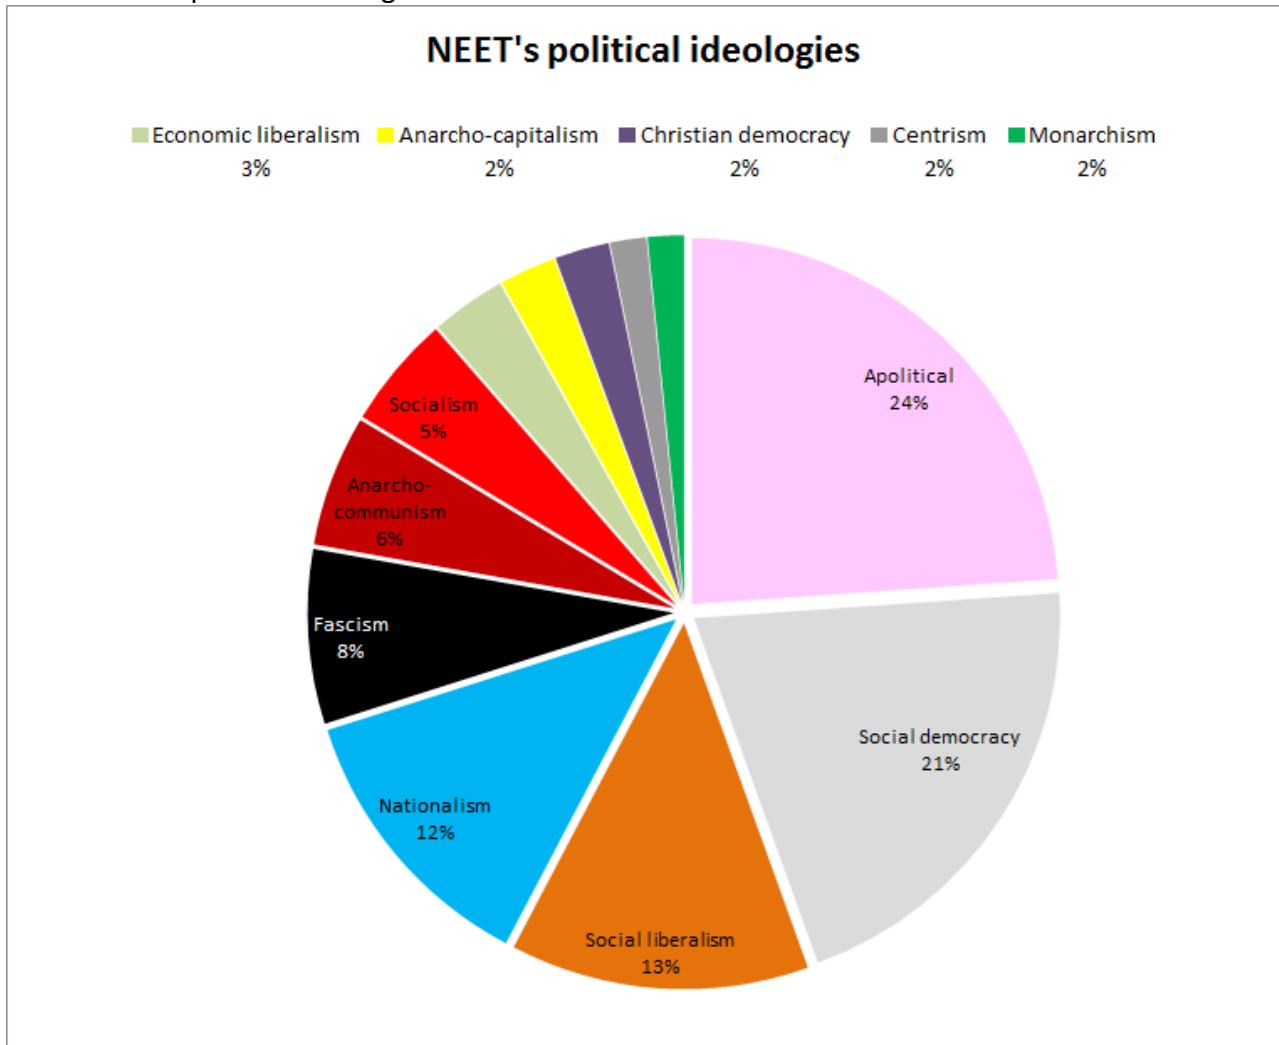

Asia and Middle East

SECONDARY STATS

NEETs

What are the political ideologies of NEETs?

- Austria: **20%**
- Ireland: **37.5%**
- Canada: **42.9%**
- Belarus: **44.5%**
- UK: **46.8%**

IMMIGRANTS vs NON-IMMIGRANTS

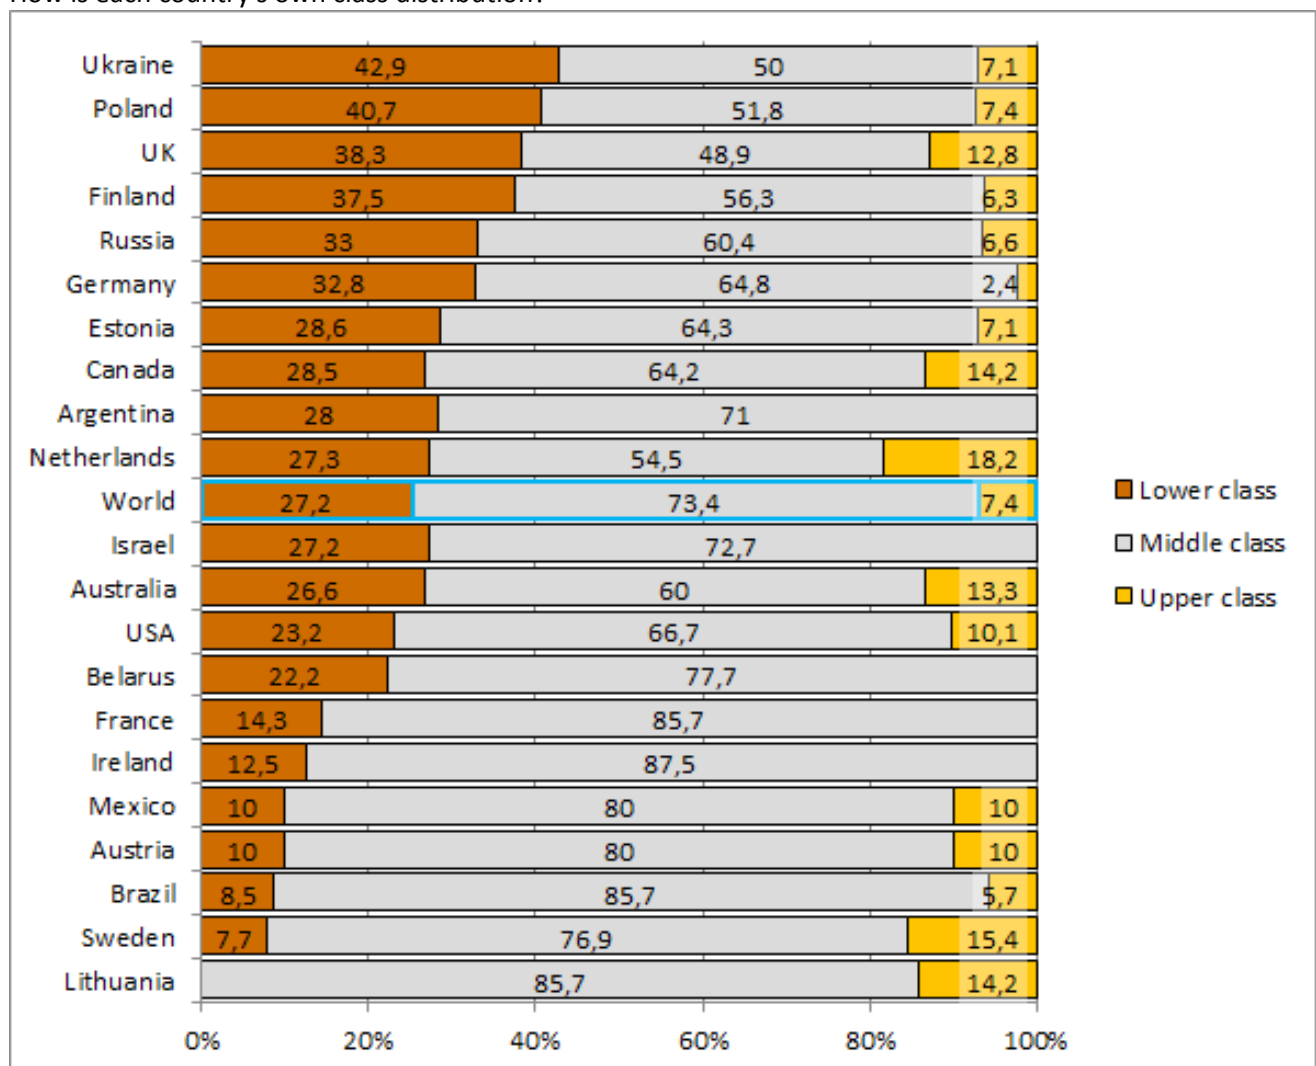

Do girls love foreign cock? Do immigrants have higher percentages of kissing, fugging and dating experience? **Yes, they do.**

	Kissed	Fugged	Had gf/bf
Immigrants	75.5%	50.8%	60.6%
Non-immigrants	61.2%	43.5%	42.8%

SECONDARY STATS

SOCIAL CLASS

How is each country's own class distribution?

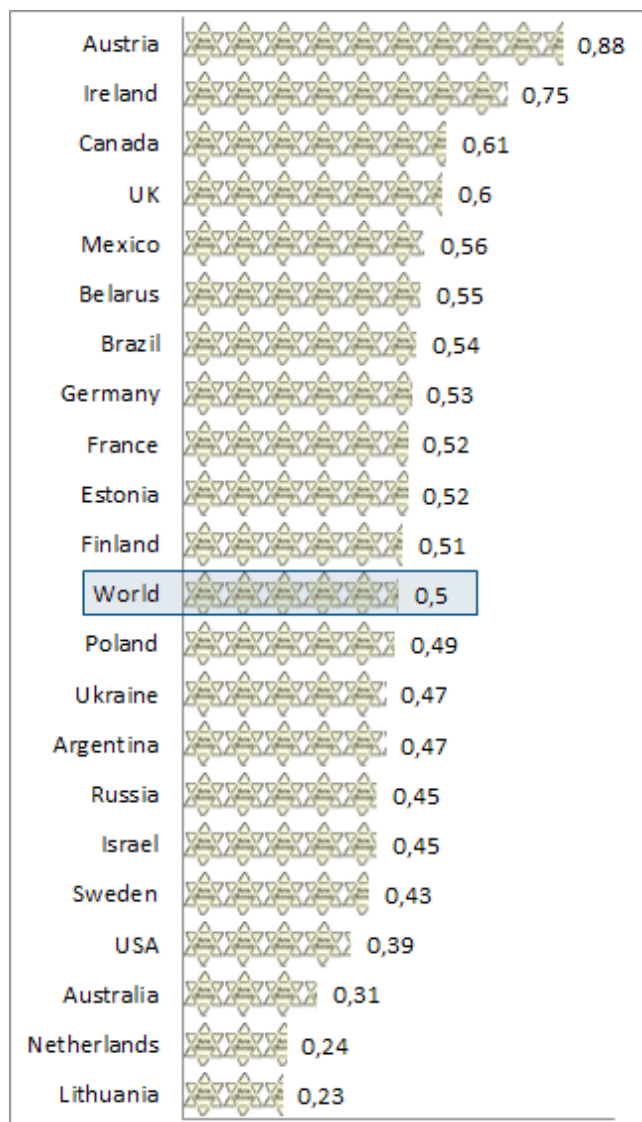

KEINBERND-O-METER

- Considering answers to these questions:
 > Have you ever kissed?
 > Have you ever fugged?
 > Have you ever had a gf/bf?
 • The Keinbernd-o-meter shows which countries have Bernds with higher probabilities to be keinbernds.

0 = Not Keinbernd at all

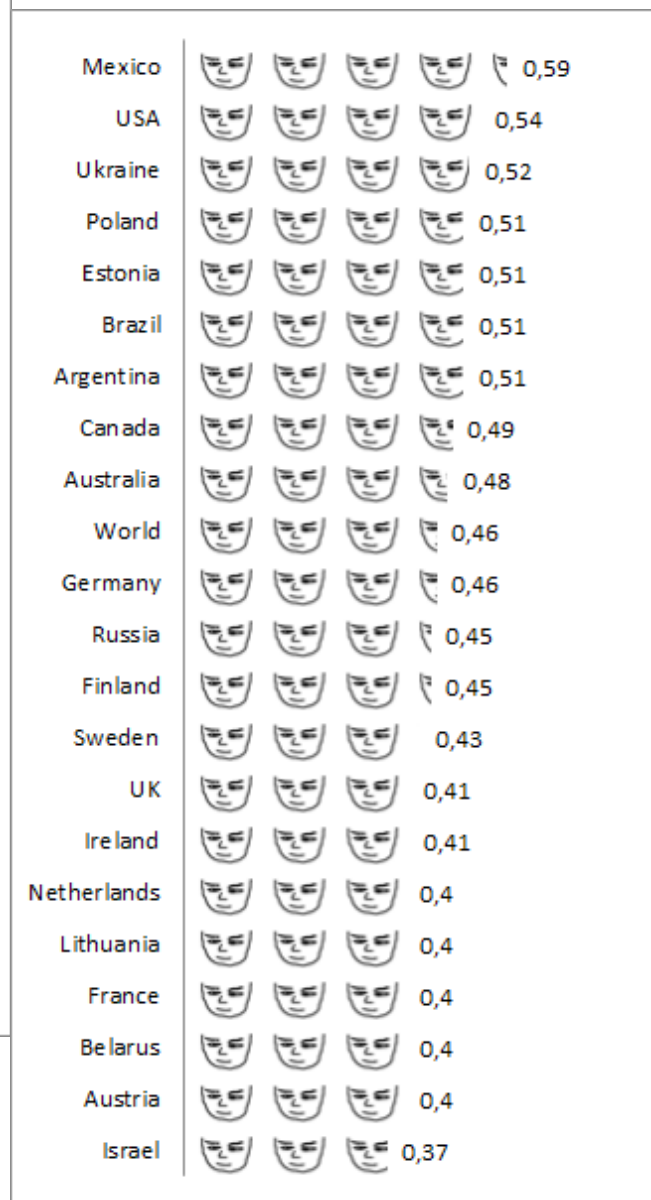

1 = Maximum Keinbernd

INTEREST IN WORLD NEWS

- Similarly to the Keinbernd-o-meter, this scale from 0 to 1 shows how much Bernds from each country are interested in different regions of the world's news.
- The higher the number, the more they care beyond their home region.

Generally, New World dwellers and Eastern Europeans are often more interested in different regions of the world's news, while Western Europeans, in average, only care about what happens in their own region and neighboring regions.

FATNESS

Which are the fattest nations on /int/?

Is America really fat?

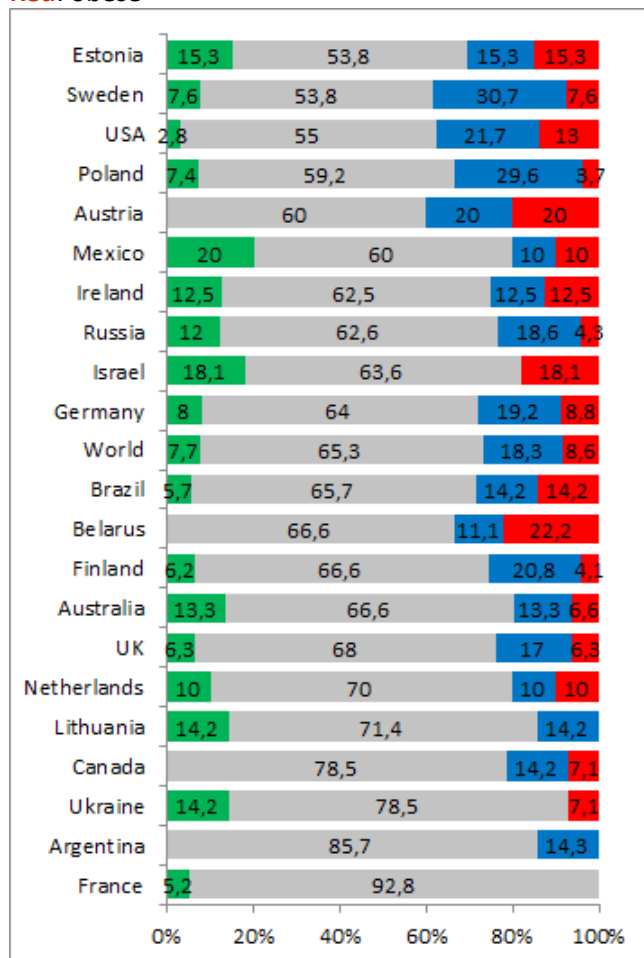

In %, by each country. Labels:

Green: underweight

Gray: normal

Blue: overweight

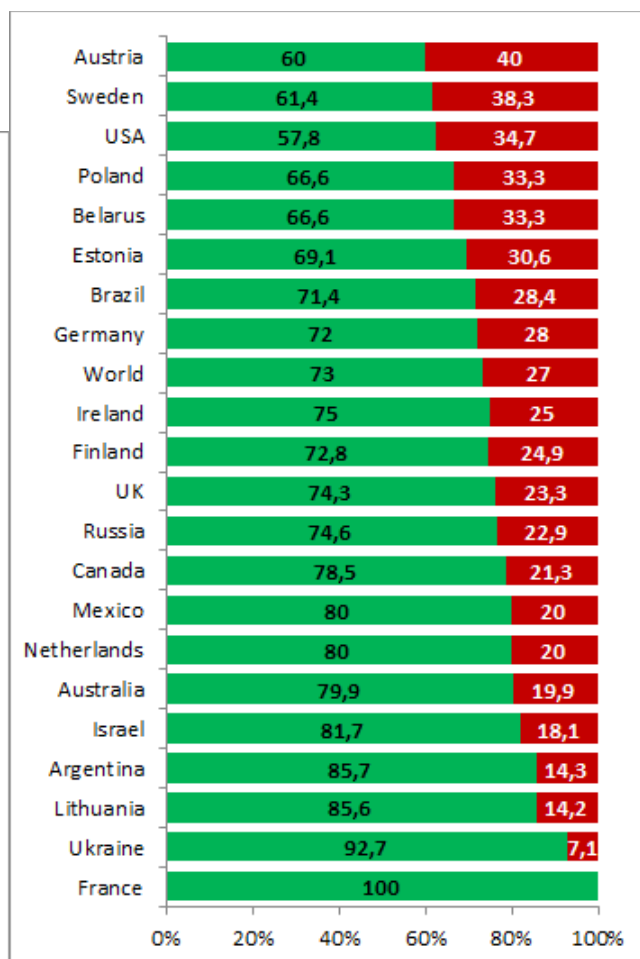

Red: obese

For more info, see [Body mass index categories](#).

Stacking underweight and normal into **slim** category and stacking overweight and obese into **fat** category:

In %, by each country:

Austria, Sweden and USA are the fattest countries on /int/.

Oh the other hand, Lithuania, Ukraine and France are the fittest countries on Krautchan.

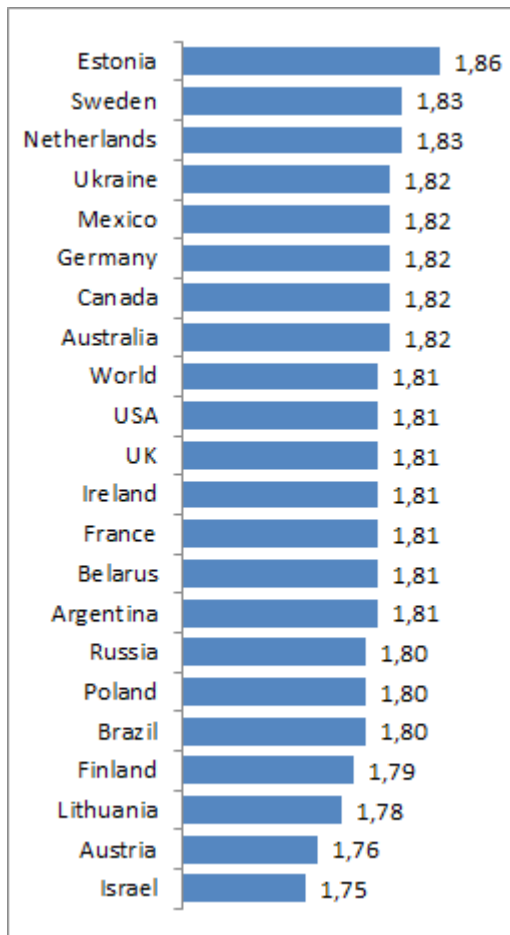

HEIGHT

Which are the tallest countries on /int/?

Are Dutchmen the tallest Bernds on Krautchan?

Well, they kind of are.

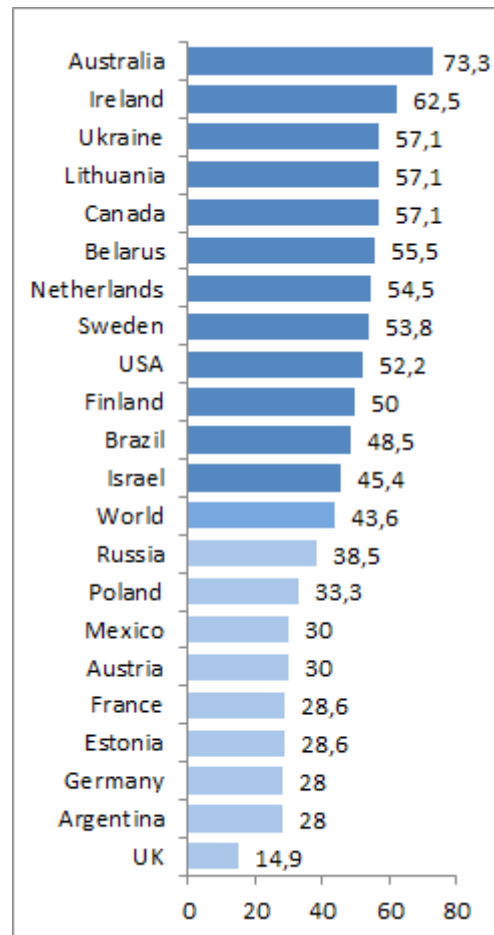

Average height, in meters and descending order.

In this graph, only Bernds were counted.

PHYSICAL ACTIVITY

Countries where Bernds do physical activities, in percent and descending order.

DRINKING

Which countries have the greatest drunkards on /int/? Slavs? Germans? Anglos? Latinos? You now may know!

Stacking drink (sometimes) and drink (often) into the same category, we get:

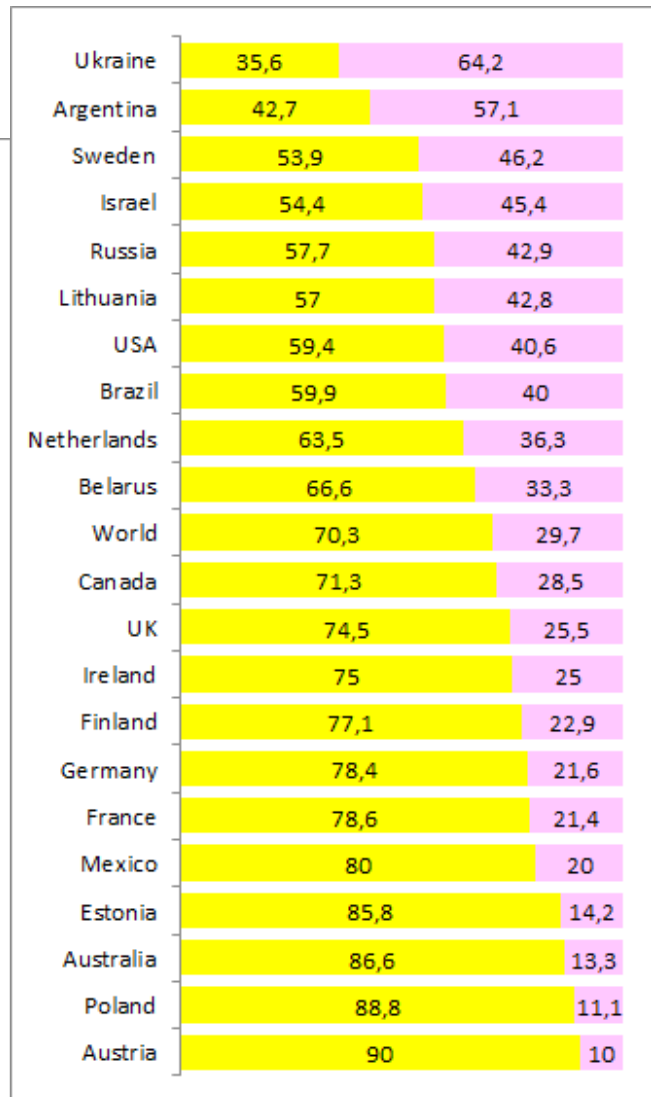

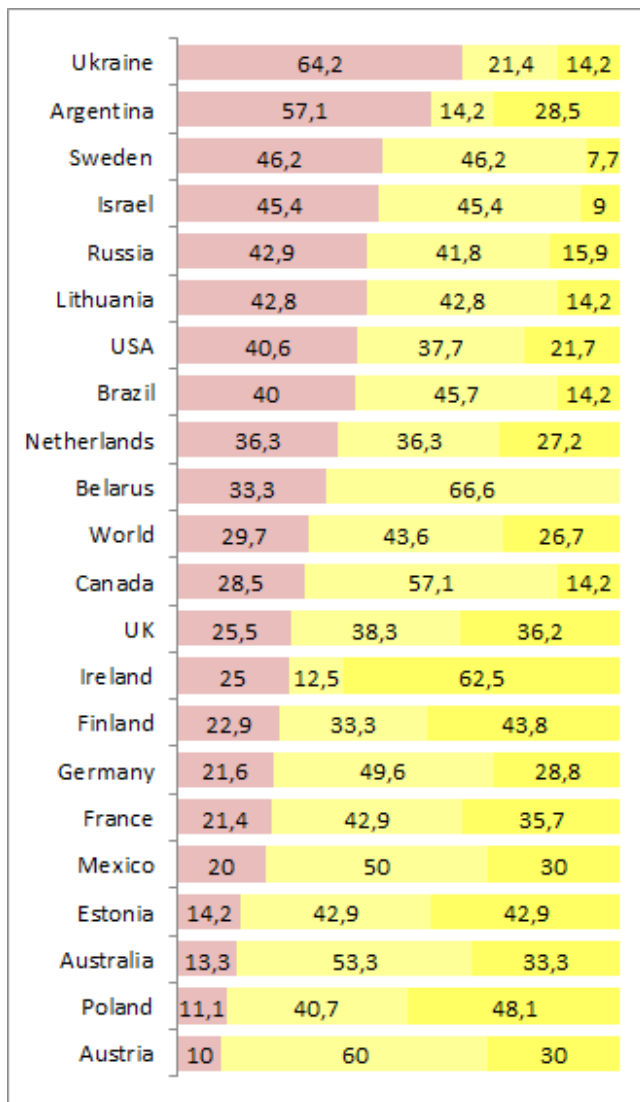

Yellow: Drinks

Pink: Doesn't drink

Pink: Doesn't drink

Light yellow: Drinks (sometimes)

Yellow: Drinks (often)

LOVE-HATE (or just love, or just hate between countries)

Australia

Five Australians picked China as the country they dislike the most. New Zealand was picked as the country they like the most only once.

Austria

Surprise, surprise. Germany was the country liked the most by Austrians. France, Israel and USA were equally picked as the countries Austrians dislike the most. Why so Nazi?

Belarus

Now, a surprise. Not even one Belarussian picked Russia as the country they like the most. Actually,

Russia was the most hated country by Belarussians, being disliked by half of respondents.

A

Bosnia

The only one Bosnian respondent picked Serbia as the country he/she dislikes. Remove kebab!

Brazil

The countries Brazilians like the most were Germany, followed by Russia, followed by Japan and Brazil coming close. USA is disliked by quite a lot Brazilians, followed not closely by China.

Canada

Canadians are somewhat pure love. Many of them didn't pick a country they dislike the most. India was the most disliked, with 2 votes only.

Estonia

No big surprises. Finland, by far, the most liked country. Russia, also by far, the most disliked country.

Finland

No surprise neither. Who knew Finns were such narcissistic? Finland was the country liked the most by quite a lot of them, followed closely by Estonia. Russia, USA and Sweden are the countries disliked the most – most of Finns picked at least one of them.

France

Frenchmen love France. No major hatred towards Germany or the UK was seen.

Germany

Like Finns and their self-love, Germany was the country Germans like the most. Followed by Netherlands, Poland, USA and Russia. Good portion of Germans disliked the USA. Second most disliked country was Turkey.

Israel

Good goyim! Merchant's greatest ally was the country they like the most.

Lithuania

As expected, few Lithuanians dislike Polan.

Mexico

There is nothing unanimous among Mexicans, save for how much they dislike the USA.

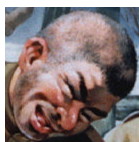

Netherlands

They like Netherlands as much as they like Germany and Russia.

Polan

Tsundere! Country most liked by Polelings was Russia! Russia was also the country most disliked by them. That bipolarity feel.

Russia

Russians were, by far, the ones that like the biggest spectre of countries. Their favourites are Russia, Germany, Norway, USA, Poland and Brazil. *Pidorashka!* Russia was the most disliked country picked by Russians, followed closely by USA.

Sweden

Swedes chose Sweden and Finland as the countries they like the most.

INNIT UK

Stay classy, Brits. The country they like the most is the UK, followed by Australia, France and Russia. USA is, by far, the most disliked country by the Ladcham8s, followed not very closely by the UK itself, innit.

Ukraine

Only one remarkable thing: Russia as the most disliked country. Woop, woop, surprise, surprise.

USA

USA! USA! USA! Fuck yeah Murika! Americans selected their own country as the country they like the most. Russia, followed by Germany are the countries that draw most positive attention from Burgerlads. The UK, on par with the US, are the countries Americans dislike the most, followed by Mexico, ese.

CURIOSITIES

- The idea of conducting the survey came after I enrolled in a STATA course. I hoped having a big dataset would help me to understand statistics better. Now I'm not sure if I know more or less than I used to.
- Most of this survey analysis was done while I listened to hardbass, especially this compilation.
- No German who has replied to this survey declared him/herself as fascists.
- I watched roughly 5 hours of SPSS tutorials on Youtube to get to know better the software.
- Allegedly, 3 mods replied to this survey.
- I failed one class because of this survey.

That is all. I hope you enjoyed it as much as I did.
